Serverless CQRS C# VM Setup

Running the API

Download CSharp Workshop Windows VM.ova
Open VirtualBox. Click on Tools → Import
Select CSharp Workshop Linux VM.ova
PIN is: 3221

Project directory is ServerlessCQRSCSharp

Execute the command EventStore.ClusterNode.exe in an admin Command Prompt to run your event store. Make sure that the event store database is installed and running. This can be verified by loading http://localhost:2113/web/index.html#/ The default username/password is admin/changeit. Commands cannot be issued to the hotel reservation system without an active event store.

Open HotelManagement.sln with Visual Studio

Run the solution
